Hoot Aerobic Systems

Comal Concrete Products is very proud to have successfully provided thousands of **Hoot Aerobic Systems** to Central and South Central Texas!

We believe it is our responsibility to make a positive difference in our community by offering the Hoot Aerobic Wastewater Septic System. The first aerobic system to be introduced to the marketplace in Central Texas as a complete five stage, one piece wastewater treatment that operates like a small municipal treatment plant on your property. All Hoot Systems have been tested at Baylor University in Waco, Texas since the 1980's. Hoot never stops testing their systems! Hoot Aerobic Systems are tested and certified by NSF International, National On-site Wastewater Recycling Association and the National Environmental Health Association.

Installers and homeowners find the Hoot system to be "user friendly", quiet and cost efficient to operate. The Hoot Aerobic System recycles 99% of all waste that is introduced into the system, allowing the effluent to be used for irrigation water for your lawn. Make the choice today to protect our environment for tomorrow!

We provide a first class system and the expertise to know how to operate and maintain it properly! We offer a three year warranty on all Hoot Systems provided that the homeowner maintains their contract with the original service provider. We also have parts for maintenance in inventory for your convenience at our facility.

We at Comal Concrete Products, Inc. will continue to provide the **BEST** aerobic systems around and our customer's satisfaction is guaranteed! We welcome the opportunity to serve your business needs!

~ ~ Comal Concrete Products, Inc. is an eco-friendly company! ~ ~

Remember ~ Don't Pollute Install a Hoot!!!
